Mission Statement:

Resurrection Electronics Emporium strives to make electronic repair cheaper for consumers and to reduce the amount of electronic waste produced by facilitating reuse.

Executive Summary:

At some point in life, almost everyone has dealt with the horror of repairing and replacing electronics. Companies deliberately make repairs needlessly difficult to discourage it and instead push replacement. Furthermore, when we do replace, our 90% functional old electronics usually go to waste. Resurrection Electronics Emporium (REE) strives to address this problem by facilitating repair and reuse.

The best way to understand REE's business model is as an electronic scrapyard. There are two sides to the business model: purchases and sales. On the purchase side, customers are brought in by promising offers on broken electronics. Skilled workers will assess the electronics and determine an estimated value, which will be lowered slightly to account for operation costs and then offered to the customer as a buy price. If they accept the price, the electronic will be broken down into its components that still function. Then, other customers whose electronics have broken components could come and purchase the scrapped parts, and REE's skilled workers would install the parts.

As an example, consider a smartphone that has suffered catastrophic screen damage. Its resale price would be practically zero, even though there are still many functional components. The smartphone would be dismantled and parts like the camera, charging port, speakers, microphone, battery, and various buttons would be removed and inventoried. These items would be uploaded to REE's database with all identifying information. Then, a customer with a functional phone but a broken camera could search our database for the camera they need, and if one is available the customer can come in and purchase it. The result is a customer who made some money, a customer who was able to repair their phone cheaper than usual, and less electronic waste in the world.

As illustrated, REE is positive for everyone involved. There are no drawbacks, except that large companies will have more difficulty overcharging consumers.

Installation and Running Instructions

1. Go to <https://github.com/mrichards03/Resurrection-Electronics-Emporium> and download the zip folder
2. Unzip the folder to your desired location
3. Ensure you have docker installed. If you don't, download from <https://docs.docker.com/desktop/install/windows-install/>
4. Open the project in your preferred IDE
5. Build the project
6. Open a command line and navigate to inside the Resurrection-Electronics-Emporium-main folder
7. Run `docker-compose up -d`
8. Open a new web browser window and navigate to <http://127.0.0.1/shop/loaddata.jsp>
9. Finally, navigate to <http://127.0.0.1/shop/>
10. Login Information: Admin: username: Arnold, password: 304Arnold!
Customer: username: bobby, password: 304Bobby!

Development Project Features List Template

| Final Overall System Features | Category | Possible Points | Points | Comments / Code Files |
|---|----------|-----------------|--------|---|
| Documentation (15 total points) | | | | |
| Executive Summary (up to 1 page) | Core | 2 | 2 | |
| System Features (2 pages) | Core | 2 | 2 | |
| List of Web and AI sources used | Core | 3 | 3 | |
| Walkthrough with screenshots (up to 15 pages) | Core | 8 | 8 | |
| Hosting (10 total points) | | | | |
| Running on cloud server | Advanced | 10 | | |
| Main/Home Page (up to 14 total points) | | | | |
| Search for a product by name | Core | 1 | 1 | Listprod.jsp + Product.java + header.jsp |
| Browse products by category | Core | 1 | | |
| List products (by search/browse) | Core | 1 | 1 | listProd.jsp + productCard.jsp |
| List products with image | Core | 1 | 1 | Productcard.jsp |
| Page header with menu | Basic | 1 | 1 | Header.jsp |
| Page header shows current logged in user | Basic | 1 | 1 | Header.jsp |
| Dynamic products on page based on sales | Basic | 2 | | |
| Improved UI (user-friendly, images, etc.) | Basic | 2 | 2 | |
| Product recommendation based on user | Advanced | 4 | | |
| Shopping Cart (up to 8 total points) | | | | |
| Add to shopping cart | Core | 1 | 1 | productCard.jsp + addcart.jsp |
| View shopping cart | Core | 1 | 1 | showCart.jsp |
| Update quantity (with data validation) | Basic | 1 | 1 | showCart.jsp |
| Remove item from shopping cart | Basic | 1 | 1 | showCart.jsp |
| Improved formatting/UI (e.g. in header bar) | Basic | 1 | 1 | Header.jsp (cart icon bounces when cart has item) |
| Cart stored in database between sessions | Basic | 3 | | |
| Checkout (up to 9 total points) | | | | |

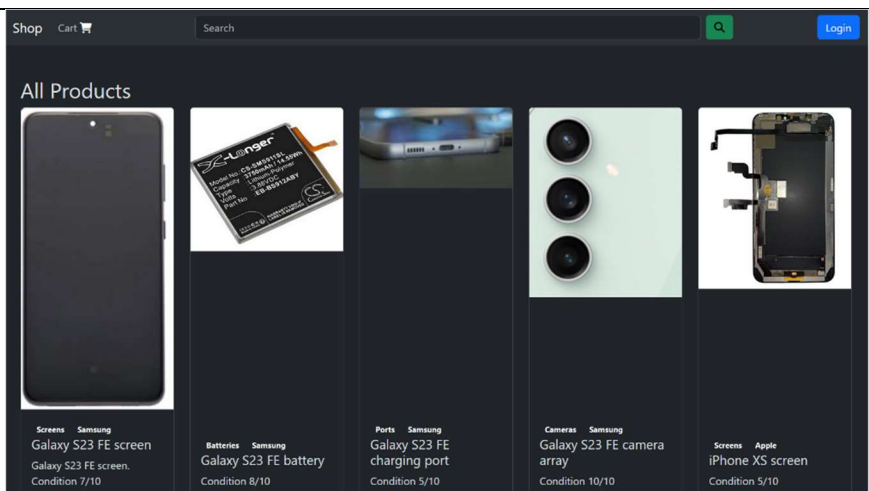

| | | | | |
|---|----------|---|---|--|
| Checkout with customer id | Core | 1 | 1 | If the user is not already logged in, they are redirect to login page and then directed to checkout.jsp |
| Checkout with payment/shipment info | Basic | 2 | 2 | Checkout.jsp + global.js + addressesList.jsp + paymentsList.jsp + AddPayment.java + AddAddress.java + GetUpdatedPayments.java + GetUpdatedAddresses.java + toast.jsp |
| Checkout with data validation | Basic | 2 | 1 | Checkout.jsp |
| Multiple shipments per order supported | Advanced | 2 | | Note: Requires DB change. |
| Calculate taxes/shipping (by items/state) | Advanced | 2 | | Note: Requires DB change. |
| Product Detail Page (up to 2 total points) | | | | |
| Product detail page and item description | Core | 1 | 1 | productCard.jsp |
| Product detail has an image from database | Core | 1 | 1 | productCard.jsp |
| User Accounts/Login (up to 12 total points) | | | | |
| Create user account page | Basic | 2 | | |
| Create account with data validation | Basic | 2 | | |
| Edit user account info (address, password) | Basic | 2 | 2 | Customer.jsp, UpdataCustomer.jsp, toast.jsp, global.js |
| Login/logout | Core | 1 | 1 | |
| Register user/Forgot password email | Advanced | 4 | | |
| Page listing all orders for user | Core | 1 | 1 | Order.jsp + Order.java |
| Product Reviews (up to 5 total points) | | | | |
| Ability to enter a review on a product | Basic | 2 | | |
| Display product review on product detail page | Basic | 1 | | |
| Restrict to one review per user on item purchased | Advanced | 2 | | |
| Warehouses/Inventory (up to 5 total points) | | | | |
| Display item inventory by store/warehouse | Basic | 2 | | |
| Edit item inventory by store/warehouse | Advanced | 3 | | |
| Administrator Portal (up to 19 total points) | | | | |
| Secured by login | Core | 1 | 1 | Admin.jsp |

| | | | | |
|--|----------|---------|----|---|
| List all customers | Core | 1 | | |
| List report showing total sales/orders | Core | 1 | 1 | Admin.jsp |
| Report with a graph | Advanced | 3 | 3 | Admin.jsp |
| Add new product | Basic | 2 | 2 | Listprod.jsp + productCard.jsp + addproduct.java + Product.java |
| Update/delete product | Basic | 2 | 1 | Listprod.jsp + productCard.jsp + deleteProduct.java + Product.java |
| Change order status/ship order | Basic | 1 | 1 | Ship.jsp, shipProd.jsp |
| Upload a photo to file system for product | Advanced | 2 | | |
| OR: Upload a photo to database for product | Advanced | 4 | 4 | productCard.jsp + addProduct.java + Product.java |
| Database restore with SQL script | Basic | 2 | | |
| Add/update warehouse, customer | Basic | 2 | | |
| | | | | |
| Database System/General | | | | |
| Implement some validation using triggers | Advanced | 2 | 2 | Trigger that adds row in inventory when product is added |
| Use AJAX for some pages | Advanced | 4 | 4 | Checkout.jsp + global.js |
| User interface and navigation/usability | | Up to 5 | 5 | Cohesive look with dark mode, user friendly navigation and automatic redirection when needed. |
| <i>Others (your suggestions)</i> | | Up to 5 | 5 | User can have multiple addresses, servlets and classes are being used, cart icon bounces when items in cart, pagination on products page, show password on login, toasts when saving/adding/deleting, data validation using regex when updating customer info, date range for sales graph |
| | | | | |
| Total: (out of 50 with maximum of 10 bonus marks. i.e. 60 points out of 50 is max.) | | 115 | 66 | |

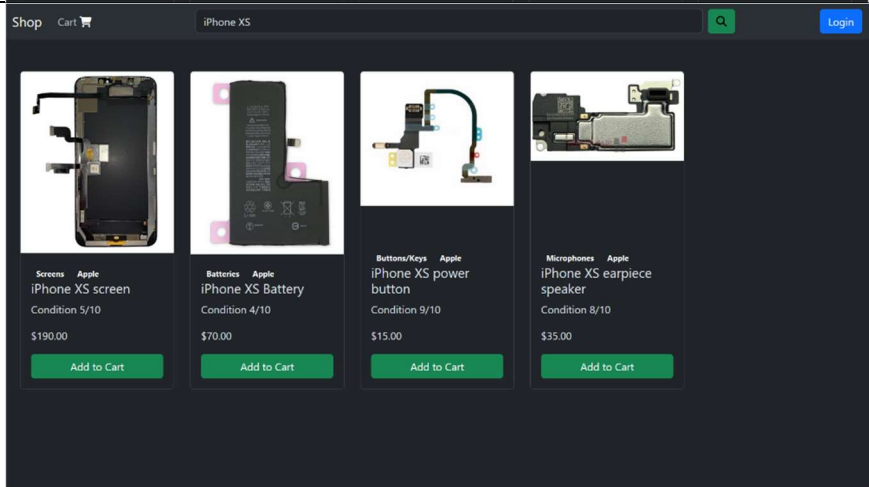

Walk-Through:

Customer Side:

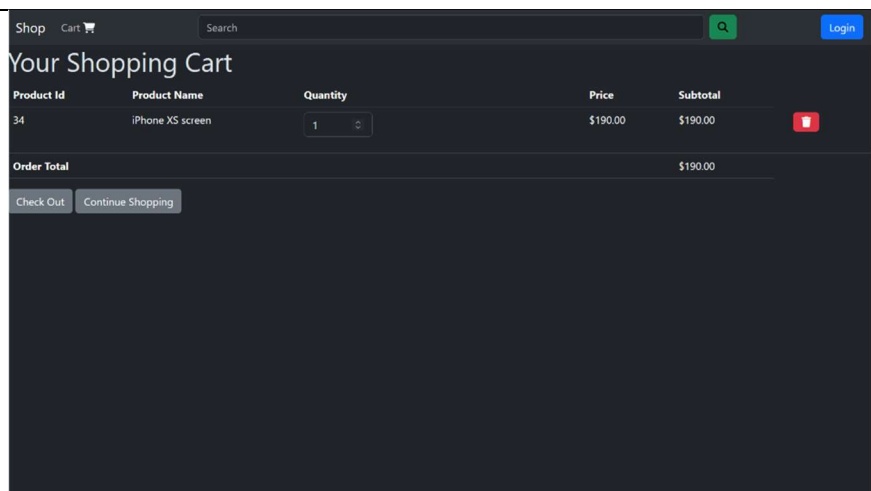

When the site is first accessed, the user is taken immediately to the product page without asking them to log in

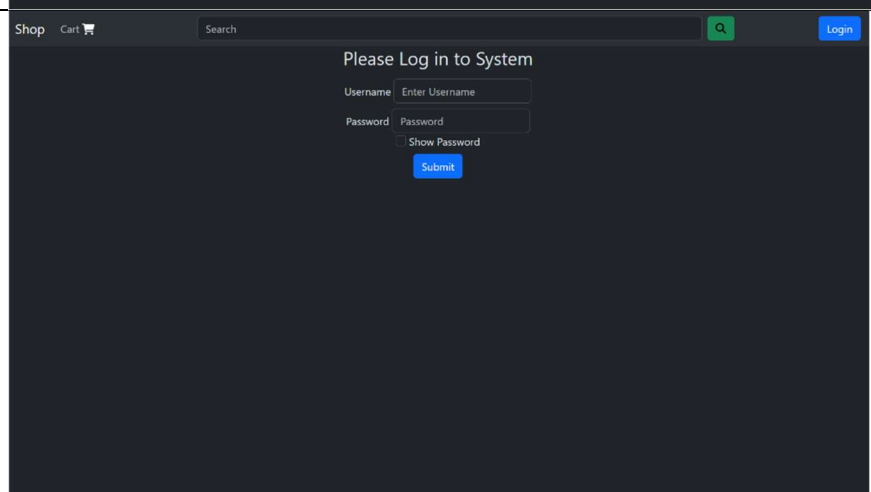

From the products page, a user can search for their desired product.

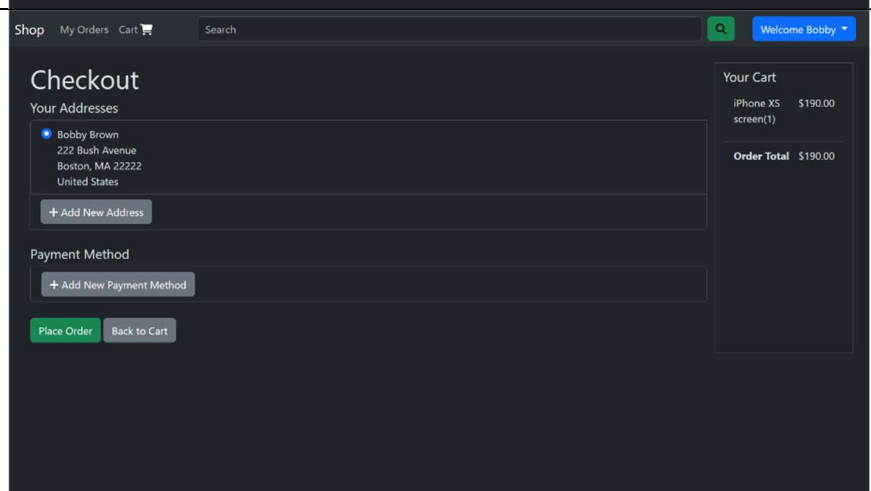

After adding a product to their cart, the user is taken to their cart. The user can either return to the products page, or checkout. This walkthrough will proceed to checkout.

Once an un-signed-in user tries to checkout, they are asked to sign in. I will sign in as a customer, using username "bobby" and password "304Bobby!"

As a signed-in user the checkout displays address information and payment information. A user can add more, and all will be saved. All important fields include data validation.

Here I add a payment method to make it possible to place the order. Notice the notification in the top right.

The screenshot shows the checkout page with the following details:

- Shop Header:** My Orders, Cart, Search, Welcome Bobby
- Checkout Section:**
 - Your Addresses:** Bobby Brown, 222 Bush Avenue, Boston, MA 22222, United States. Includes a button to '+ Add New Address'.
 - Payment Method:** Card ending in 1234, Expires 3/2024. Includes a button to '+ Add New Payment Method'.
 - Buttons:** Place Order, Back to Cart
- Notification:** Payment added successfully (top right)
- Order Summary (Right Panel):**
 - YOUR CART
 - iPhone XS screen(1) \$190.00
 - Order Total \$190.00**

After placing the order, I am shown the following screen.

The screenshot shows the 'Your Order Summary' page with the following details:

- Shop Header:** My Orders, Cart, Search, Welcome Bobby
- Your Order Summary Table:**

| Product Id | Product Name | Quantity | Price | Subtotal |
|--------------------|------------------|----------|----------|-----------------|
| 34 | iPhone XS screen | 1 | \$190.00 | \$190.00 |
| Order Total | | | | \$190.00 |
- Order Status:** Order completed. Will be shipped soon...
Your order reference number is: 13
Shipping to user: 2 Name: Bobby Brown

As a customer, I can view a history of my orders by using the header menu, though I do not have access to anyone else's.

The screenshot shows the 'Orders' page with the following details:

- Shop Header:** My Orders, Cart, Search, Welcome Bobby
- Orders Table:**

| Order Id | Order Date | Customer Id | Customer Name | Total Amount | Status | | | | | | | | | | | | | | | | | | | | | | | | |

Admin side:

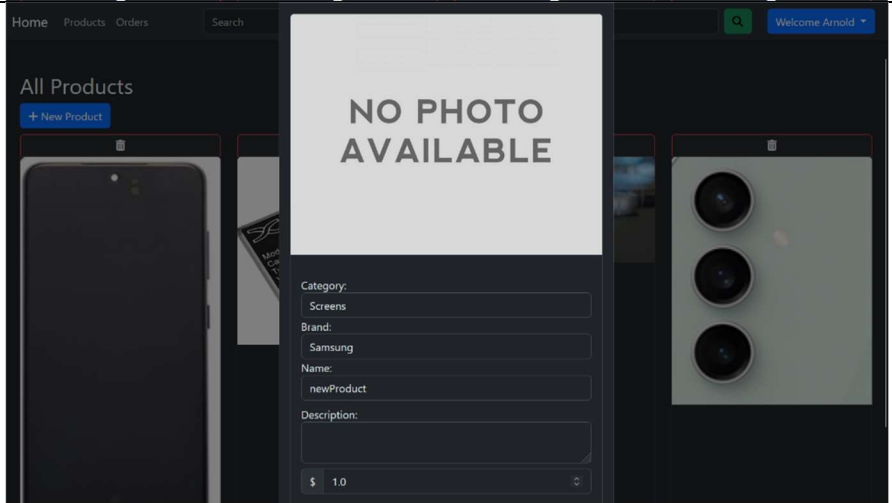

As an admin, my products page looks different, as I can add, delete, and modify products through the GUI.

The admin sign-in used was username "arnold", password "304Arnold!"

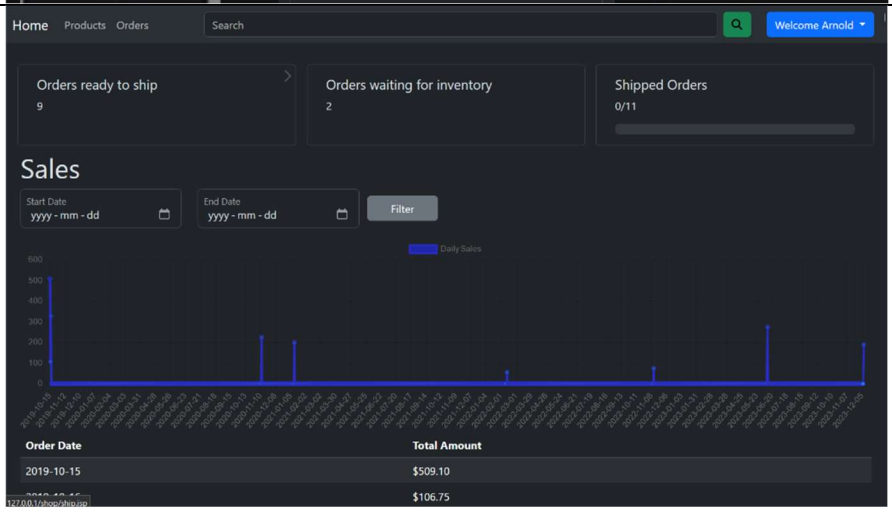

Here is the view when adding a product.

As an admin, you gain access to the home page through the header menu, which shows a graph and a list of sales by day. Admins can select a specific range here to view any desired period.

If an Admin clicks on “Orders ready to ship”, they are sent to this page, that displays all orders the database has sufficient inventory for.
